

Operations Quick Start Guide

Setup your access control operations in minutes

When & Where: schedules, site, and doors

This quick start introduces you to the basics of AirAllow. You'll set an automatic unlocked schedule for open door access to customers. Another where members can use their phone to gain access and relock after them.

Next, you create a holiday, add a user and assigned access rules. You'll grant temporary access to a visitor with one-click passes. Finally, review the audit trail activities.

☐ Setup Staff & Open Schedules

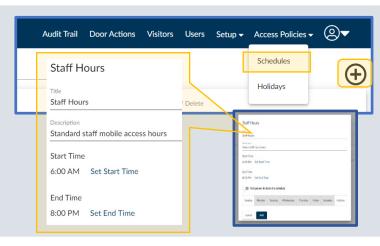

- 1. Access Policies > Schedules > Add Icon
- 2. Change title to "Staff Hours"
- 3. Set times & Day of Week, Save
- 4. Add Icon > Title to "Open Hours"
- 5. Set times & Day of Week, Save

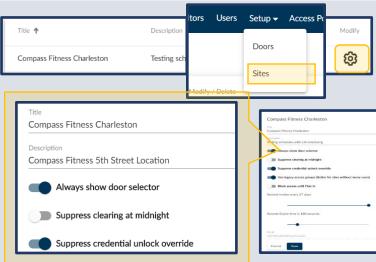

☐ Name site, suppress clearing...

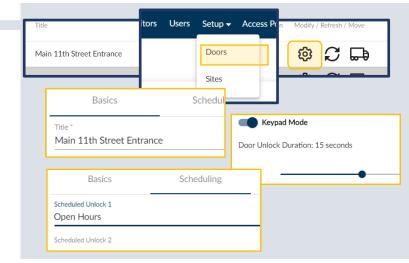

- 1. Setup > Sites > Cog icon
- 2. Enter a name for your site
- 3. Toggle Suppress clearing at midnight on
- 4. Press Save

☐ Name door, set unlock duration

- 1. Setup > Doors > Door Cog icon
- 2. Enter a friendly door name
- 3. Set **Door Unlock Duration** to 15 seconds
- 4. Select the Scheduling tab
- 5. Select the "Open Hours" schedule
- 6. Press Save

Operations Quick Start Guide

Setup your access control operations in minutes
