- **Invitation System:** Automatically email invitations to users & visitors with one click.
- **Future Proof:** without changing hardware, upgrade to a feature rich subscription as your access control needs grow.

## Specifications

The AirAllow Remote Pro Subscription (Pro) is a convenient, easy-to-use solution where advanced access capabilities are desired. With the AirAllow Pro, administrators can manage, monitor, and take action from anywhere from any device. Remotely unlock a door, change access policies, immediately disable a user, schedule a visitor, automatically send email invitations, restrict access to a schedule, lockdown in an emergency... all from the convenience of a remote location using the Enclave App or Admin Portal. Pro supports a variety of virtual authentication methods such as clicking a virtual button or a web-link on your phone. Ideal for mixed mode environments where some users may not have a smart-phone, Pro supports traditional physical credentials such as access cards and fobs.

**Unlimited Registered Users:** supports unlimited number of users

**Browser-based Admin Portal:** monitor, manage, and act from the web portal

**Unlimited Passcodes:** Pro supports an unlimited number of passcodes

**Cloud stored Audit Trail:** saves activities for up to one year.

**Unlimited Visitors:** supports unlimited number of visitors

**Wiegand Interface - Physical Credentials:** cards, fobs: up to 100 physical codes

**Factory Direct End-User Support:** with the Pro system, the technical contact of the end-user has phone, chat, email, and knowledge base support.
